

Where the Conversion Leaks Are

warbyparker.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the quiz-driven product discovery path, but it is being diluted by competing CTAs and a prominent insurance benefits form on the homepage hero, which split user attention and bypass the primary path, causing confusion and reducing the likelihood of users starting the quiz.

10	Empty cart lacks trust When the cart is empty, the page fails to reassure visitors about shipping, returns, or security, which may...	High	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
